
DANIEL FLÓREZ

SOFTWARE DEVELOPER | UNITY, C#.NET, XR & INTERACTIVE SYSTEMS

Bogota, Colombia | swan364@hotmail.com | github.com/Dafovi | dafovi.dev

Interactive Design professional with more than seven years of experience building digital products with Unity and C#, from games and training simulators to XR applications and .NET/WPF desktop tools. Experienced in modular architecture, API and SDK integration, optimization, real-time systems, and hardware integration. Able to turn product and client needs into functional experiences for PC, mobile devices, and VR headsets.

PROFESSIONAL EXPERIENCE

Unity Developer - Volunteer Contributor | Dunwich Studio

2024 - 2026 | Remote

- Development and maintenance of commercial Unity projects, implementing mechanics, gameplay systems, and reusable tools.
- Refactoring and optimization of scripts with a focus on modular architecture, maintainability, and collaborative Git workflows.

Senior Unity XR Developer | Xennial Digital

2021 - 2025 | Unity | C# | OpenXR | Meta Quest | Pico

- Development of an XR aviation training simulator suite for inspection, maintenance, and operation, with more than 200 interactive technical tasks.
- Implementation of training, assessment, interaction, and multiplayer simulation systems for Meta Quest and Pico devices.
- Integration of APIs, authentication, persistence, metrics, and external services through modular and reusable architectures.
- Performance optimization and technical problem solving for PC, mobile, and VR projects in B2B contexts.
- Collaboration with multidisciplinary teams to translate procedures and client requirements into functional 3D solutions.

Lead Unity Developer | Viewy S.A.S.

2019 - 2021 | Unity | C# | Interactive 3D experiences

- Technical leadership in the development of interactive applications and 3D solutions for corporate clients.
- Design of scalable architectures, reusable systems, and integration of interfaces and multimedia content.
- Technical proposal presentation, solution estimation, and client support throughout development and delivery.

FEATURED PROJECTS

NeoTwitch

.NET | WPF | Twitch EventSub | OBS WebSocket | Arduino | Alexa

Desktop application for automating live streams through event-driven rules. It integrates external services, audio, NeoPixel lighting, and OBS actions within a modular real-time architecture.

Energy Transition AR - RENATA / ANH

Unity | C# | AR Foundation | 3D Models

Series of four augmented reality applications explaining energy transition technologies in Colombia through 3D visualization and real-time interaction.

Aviation Training Suite

Unity | C# | OpenXR | XR Interaction Toolkit | Multiplayer

Immersive simulator suite for aviation training, with interactive procedures, technical validations, user assessment, and support for collaborative training.

BeatMobile

Unity | C# | Gameplay Systems | Audio

Rhythm game developed end to end, including music synchronization, input detection, scoring logic, and game flow.

TECHNICAL SKILLS

Languages and platforms - C#, .NET, WPF, Unity, desktop applications, PC, and Android.

XR and 3D development - OpenXR, XR Interaction Toolkit, AR Foundation, Meta Quest, Pico, VR/AR, interaction, and simulation.

Architecture and integration - Modular architecture, event-driven systems, REST APIs, SDK integration, authentication, persistence, and data.

Gameplay and performance - Gameplay systems, multiplayer, reusable tools, profiling, optimization, and debugging.

Services and hardware - Twitch EventSub, OBS WebSocket, Arduino, NeoPixel, Alexa, and real-time automation.

Tools and collaboration - Git, Visual Studio, version control, multidisciplinary work, and client communication.

EDUCATION

Master's Degree in Video Game Programming | Universal Arts School, Spain

Interactive Design | Universidad Jorge Tadeo Lozano, Colombia

ADDITIONAL TRAINING

.NET fundamentals | Introduction to C# and .NET development | C# programming | Object-oriented programming with C# | SOLID principles | Data handling with LINQ

LANGUAGES

Spanish: native | English: B2, professional competency in software development and technical documentation
